## AI AUTOMATION ENGINEER

Agentic systems & business integrations | Voice AI specialization

Carlsbad, CA | (619) 707-4707 | d.miller@dgxtech.io

LinkedIn | Portfolio | DGX

Applied AI engineer building agentic workflows, business applications and integrations from discovery through production. Delivered CRM orchestration, document processing and browser automation for commercial clients. Specialized in voice AI connected to business systems and operational handoffs.

### ENGINEERING CAPABILITIES

**AI systems:** LLM orchestration, tool calling, structured extraction, classification, schema validation

**Voice AI:** ElevenLabs, Twilio; conversation design, live tool use, transfers, call review

**Automation & data:** n8n, APIs, webhooks, Pipedrive, HubSpot, Supabase, Airtable

**Applications & infrastructure:** Lovable, Playwright, Docker, VPS hosting, Cloudflare, Netlify, Vercel

**AI development & media:** Codex, Claude Code; AI-assisted coding and debugging; Higgsfield

### PROFESSIONAL EXPERIENCE

#### Founder & AI Implementation Lead

2025 - Present

DGX Enterprise AI LLC | Carlsbad, California

- Designed and delivered AI workflows from operational discovery through integration, deployment and production review. Translated business rules into agent instructions, data mappings, routing logic and human follow-up paths.
- Built connected systems spanning customer interactions, CRM records, document generation, notifications and client portals; coordinated specialist developers for custom components.

### SELECTED ENGINEERING IMPLEMENTATIONS

#### Customer inquiry processing & specialist handoff

n8n | Pipedrive | Airtable | APIs & webhooks

- Built an automated workflow for an architectural company that turned customer inquiries into linked company, contact and sales-opportunity records in Pipedrive. Checked existing records and created missing profiles.
- Assigned each inquiry to the appropriate pipeline stage and product specialist. Sent the customer a confirmation with the specialist copied and headquarters notified, and maintained an Airtable record of the submitted details.

#### Voice AI agents with live business-system access

ElevenLabs | Twilio | n8n | Pipedrive

- Deployed voice intake and technical-support systems that handled 100+ hours of live customer conversations and registered 840+ leads in client pipelines.
- Connected live organization and caller lookups to structured intake tools, call transfers and downstream processing. Reviewed transcripts and tool-call evidence to refine agent behavior and diagnose incomplete tasks.
- Separated audio and transcription webhook events to prevent duplicate downstream processing; added independent completion checks and context-rich alerts for manual follow-up.

## AI AUTOMATION ENGINEER

Carlsbad, CA | (619) 707-4707 | d.miller@dgxtech.io

LinkedIn | Portfolio | DGX

## SELECTED ENGINEERING IMPLEMENTATIONS, CONTINUED

### AI extraction, classification & document generation

- Built a pipeline that extracted contact data into JSON, classified inquiries and generated personalized communications. Applied structured output parsing and format repair before routing results to downstream systems.
- Assembled AI-generated technical reports into branded HTML and PDF attachments, then automated customer delivery, specialist notifications and delayed feedback requests.

### Browser automation, client portals & agent operations

- Implemented browser automation for project-document retrieval, applying selection rules to specifications and architectural plans before exporting consolidated PDFs.
- Built client-facing portals with Supabase authentication and application data. Deployed agents across VPS and Mac mini environments and configured daily remote-access self-audits on a personal OpenClaw instance.

## EARLIER EXPERIENCE

### Senior Project Manager

2021 - 2024

Nuway Express Inc.

- Managed government-contractor delivery involving the U.S. Navy, Air Force, Army and County of San Diego; translated acquisition requirements into coordinated vendor and stakeholder execution.

### Operations Manager

2018 - 2021

Lions Auto Transport

- Managed 5,000+ transport orders, coordinating assignments and carrier availability across multiple load boards.

### Enterprise Logistics Systems Manager

2016 - 2017

Huawei Technologies Co. Ltd.

- Used Global Trade Management (GTM), Integrated Service Delivery Platform (ISDP) and E-Customs Clearance (ECC) systems to support international logistics tracking and CIS-region operational reporting.

### Managing Partner

2015 - 2016

TransRoute Express LLP

- Led a nine-person team planning routes for $29 million in supplies and equipment; helped develop multilingual document automation and trained staff on tracking procedures.

### Logistics Manager

2012 - 2015

Bravis Alliance Ltd.

- Developed and operated automated supply-flow systems covering shipment authorization, tracking and cross-border transport.

## EDUCATION

**MBA** | California Miramar University | 2017 - 2020

**Bachelor's Degree in Business Administration** | Lindenwood University | 2008 - 2012
