DGX ENTERPRISE AI

Dynamic Grid for eXecution

AI-powered client acquisition and legal intake

Helping restraining-order respondents complete intake, make an initial payment and connect with an attorney. Launching in San Diego.

$500,000 ANGEL-LED LAUNCH ROUND

DGX Enterprise AI LLC October 2026

THE INTAKE PROBLEM

A difficult conversation becomes hours of preparation

FOR THE RESPONDENT

Facing a restraining-order proceeding can be emotional. People may forget details, describe events out of order or struggle to explain what matters.

FOR THE LAW FIRM

Attorneys and paralegals spend time on lengthy calls, repeated questions, scattered evidence and manual CH/DV form preparation.

DGX is designed to organize the account and prepare draft documents before attorney review.

Founder-identified workflow problem. Pilot testing will measure preparation time and completeness.

CALIFORNIA MARKET

Domestic violence and civil harassment both matter

77,444

Domestic violence
Case filings, FY 2024–25

About 212 DV case filings per calendar day statewide. San Diego County accounted for 7,504 of the annual filings.

35,145

Civil harassment
Orders issued, calendar 2023

Includes temporary and final CH orders, which can arise from the same case. This is an order count, not a filing count.

Different measures and periods: these figures are shown separately and are not added together.

Sources: Judicial Council, 2026 Court Statistics Report, Table 11a, p. 144. California DOJ, Pathways to Safety (2024), pp. 49, 82.

NATIONAL MARKET CONTEXT

About 4,900 protection-order requests per day

~1.8M

Estimated annual U.S. requests

~4,900

Estimated calendar-day average

Based on Pew’s analysis of 2022 state and local court data, published in 2024. The category covers protection orders in civil and domestic relations courts.

A broader national category than California CH/DV. This estimate describes court activity, not DGX’s paying customer base.

Derived from Pew: approximately 66 million cases × 2.7% protection-order requests / 365. Estimates include imputed missing data.

THE CLIENT JOURNEY

The AI guides intake and enrollment

PHONE INTERVIEW

Call a dedicated number and speak with a conversational AI agent.

SCHEDULED AVATAR SESSION

Book a virtual appointment with a lifelike AI avatar.

1 Explain and enroll

Explain the service and guide the prospective client through enrollment.

2 Collect and prepare

Ask follow-up questions, collect documents and populate applicable drafts.

3 Pay and connect

Collect the initial payment and arrange a handoff for attorney acceptance.

Planned experience. Agents identify themselves as AI. Payment alone does not establish attorney representation.

CASE-SPECIFIC PREPARATION

The interview populates the applicable CH/DV forms

01 Case details

Review uploaded papers and capture the respondent's account.

02 Form selection

Apply attorney-defined rules to identify relevant response documents.

03 Draft preparation

Populate fields and flag missing or inconsistent information.

CH-120

Civil harassment response

DV-120

Domestic violence response

Examples only. Additional forms and attachments depend on the case. Attorneys review and approve drafts.

ATTORNEY PORTAL CONCEPT

A financially committed prospect with organized intake

ATTORNEY REVIEW PACKAGE

Case overview	Proceeding, location and reported hearing date
Intake status	Interview, uploaded papers and missing items
Client intent	Request for attorney contact and representation
Payment record	Initial payment status and disclosed terms

PREPARED MATERIALS

Consented contact details

Interview record and evidence chronology

Applicable draft forms and unresolved questions

Planned portal. Attorney acceptance and a separate representation agreement precede legal representation.

PROPOSED MONEY FLOW

The client pays DGX first, then pays the attorney

$2,000

Initial client deposit paid to DGX

DGX INTENDS TO RETAIN THIS PAYMENT

The initial model funds AI-assisted enrollment, intake and preparation through the client's upfront payment.

REMAINING AGREED LEGAL FEES

The client pays the attorney directly for representation under a separate agreement.

Proposed allocation, refund terms and referral arrangement require legal review. Cash collected is not automatically earned revenue.

COMMERCIAL PROPOSITION

A paid intake can signal stronger intent to engage

$2,000

Proposed initial payment retained by DGX

Up to $10,000

Potential total engagement fees, based on the founder's estimate.

The attorney evaluates a prospective client who has made a financial commitment and completed a structured intake.

Future pricing may combine a smaller client payment with an attorney-paid acquisition fee.

Fee estimate pending validation. No guaranteed acceptance, conversion or profit. Allocation follows finalized agreements.

PLANNED AI ARCHITECTURE

Pretrained models within an attorney-designed workflow

Conversation layer	Speech recognition and synthesis support phone intake. A synchronized avatar provides a visual interview interface.
Language-model layer	Pretrained large language models use case context and attorney-designed prompts to ask follow-up questions.
Structured extraction	Schema-based outputs organize people, events and evidence references. Validation flags missing fields for review.
Document automation	Rules map the structured case record into applicable CH/DV templates for attorney review and approval.
Workflow orchestration	APIs connect sessions, uploads, case records and the portal, with planned access controls and audit logging.

Proposed architecture. DGX configures and integrates pretrained models. Implementation and validation are planned.

EXISTING DGX EXPERIENCE

Commercial AI systems already in use

100+

Hours of live customer conversations

840+

Leads registered in customer pipelines

Founder-funded to date. Sole ownership. No reported company debt.

Deployment experience across voice agents, CRM updates, databases and workflow automation.

Management-reported existing commercial results. These are not legal-platform pilot results.

ATTORNEY TESTING

An initial group expected through David’s network

11–20

Anticipated participating attorneys

DAVID J. RUYLE

Attorney and legal workflow collaborator helping shape the project and arrange initial testing.

The initial attorneys have agreed to test the service. The pilot will measure package usefulness, attorney acceptance and client enrollment.

Founder estimate, October 2026. Testing interest only. No commercial commitments or pilot results claimed.

EXPANSION PLAN

San Diego first. California next. National expansion.

01 SAN DIEGO

Launch and validate

Start with local respondents and the initial attorney network. Measure paid intake and completed handoffs.

02 CALIFORNIA

Expand statewide

Add participating firms and referral channels across California as the pilot establishes repeatable results.

03 NATIONAL

Enter additional states

Adapt forms and workflows for each jurisdiction and build local attorney coverage.

Proposed sequence. Expansion depends on validated economics, attorney capacity and state-specific readiness.

INITIAL COMMERCIAL FOCUS

Local acquisition and attorney distribution

RESPONDENT ACQUISITION

Damir leads outreach to potential referral sources and tests a focused local landing page. Organic content supports longer-term discovery.

ATTORNEY DISTRIBUTION

David helps introduce prospective testers. Participating firms define the matters they want and evaluate completed packages.

Track each source through completed intake, client payment, attorney acceptance and completed handoff.

Proposed launch channels. Referral sources and repeatable acquisition economics remain to be established.

PRODUCT POSITIONING

The proposed advantage is a complete matter handoff

Manual intake	Staff gather the account and organize documents.
Lead generation	A contact still needs qualification, intake and engagement.
Form software	Users supply facts for document preparation.
DGX planned workflow	AI enrollment, client payment, draft forms and an organized attorney handoff.

Comparison of workflow categories, not a feature audit of named competitors. Performance advantage remains to be tested.

DEVELOPMENT AND VALIDATION

A 12-week build target, followed by staged testing

Weeks 1–4

Workflow and foundations

Attorney rules, form mapping, consent and phone intake.

Weeks 5–8

Working portal

Avatar intake, draft forms, payment workflow and attorney access.

Weeks 9–12

Pilot preparation

Testing, corrections and readiness review with initial attorneys.

After readiness review: expand testing toward 11–20 attorneys and evaluate client payments and attorney handoffs.

Founder-estimated development target. Launch timing depends on testing and appropriate legal arrangements.

PILOT MEASUREMENT

The pilot tests payment conversion and successful handoff

Intake completion	Track inquiries, completed interviews and missing information.
Client payments	Measure payment conversion, cancellations and refunds.
Attorney acceptance	Track accepted matters, completed handoffs and package corrections.
Unit economics	Compare earned revenue with acquisition and variable delivery costs.

Compare intake and preparation time with the participating attorneys’ existing process.

Planned metrics. Cash receipts and earned revenue tracked separately. Pilot results will guide expansion spending.

CAPITAL PLAN

$500,000 for launch and commercial validation

Product and operating personnel	**$300,000**	60%
Attorney consulting and workflow validation	**$45,000**	9%
AI, hosting and software	**$22,500**	4.5%
Acquisition experiments and content	**$45,000**	9%
Business operations and employer costs	**$37,500**	7.5%
Setup and contingency reserve	**$50,000**	10%

Base case: $30K monthly spending for 15 months, plus a $50K reserve. No revenue assumed.

Proposed allocation, subject to quotes and final budget. $25K–$35K monthly scenarios imply about 13–18 months.

THE TEAM AND INVITATION

An angel partner for the first commercial launch

DAMIR MILLER

Founder and CEO
Product development, integrations and commercialization.

DAVID J. RUYLE

Legal workflow collaborator
Attorney input and introductions to prospective testers.

Seeking capital and an experienced partner to help establish customer acquisition, paid demand and a repeatable operating model.

d.miller@dgxtech.io (619) 707-4707 dgxtech.io
